Town of Sudbury

To attended Court at Cambridge Dec
term 1831 Concord 2 day March term
& June 2 days 1832 as agent to defend
a caus of complaint of the North road
July 1832 to spreambleating & taking the
Sept a Survey of the Mile with Surveyor
Sept Bounds of the poor farm 75
to 4½ days of hard work of the poor 4 50
to 5 days of ox work on said farm 4 00
to 2 ½ bushel of rye at $1,10 3 16

Let us not murmur or complain
For if we do we sin
Various trials have we often met
Indeed our sins cannot be complete
Great trees from little acorns grow
Oft times it happens so we know
Our days begin with trouble here
Death is always standing near
Each one owes pay the debt we owe
Nothing here can we claim below
Our friends from us are call'd away
We all of us soon must decay

Sept 1832

Love your enemies

I take my pen in hand to write a line to inform you of my health

Nov[r] 16[th] 1835 John Wilkins Come to the poor farm

18[th] Eli J Haynes went to Pitmans

14[th] Eli Come from Chance Moores went to Mores August 25[th]

Dec[r]
21 paid for a letter to Nabbarston for the town 12

Nov[r] 24[th] 1836 Eli Come away from Prats

I am ashamed of your letter read which you
Backward as I can spell the same still
Sometimes I am black sometimes I am white
Sometimes in the dark Sometimes in the light

I am a word of your letter as you give my
Read be backwards and I spell the same
often They try to keep me in the dark
And Do let them make a cripet

Settlement

6 V F

When in infancy you crieptt
And on your parents bosom slept
Restless as other children are
Remember than their anxious care
Ever show them due respect
Never treat them with neglect

Honor to parent is their due
And think what they have done for you
Yes parents they have had their day
Now Children think them in the way
Whatever not a note in a parent to spit
Since there may be a beaman your own eye

Age is creeping on fast
Behold how short seems the past
Endeavour to do what just and right
On the side that's clear and bright
And now our journey is begun
Life is short it cannot be long
Behold the years come hastning on
Ere we shall say our joys are gone
Remember old and young are call'd away

Miss Jones is making a

Long may we revere the name of Washington
Enjoy the freedom which his sword won
And strive to imitate his glorious name
Never was man more worthy of his fame
Death at last freed him from pain
Ever think of loss his eternal gain
Did not he strive to gain the field
and his foes at length did yield
He burst the fetters of the land
And taught us to be free
Yes pain'd the dignity of man
Now a free nation he
Ever shove to keep them united
Reward their thanks and see them delighted

When wars and fightings cease
Instead of war unite in peace
Listen to all trials meekly laid
Live like the Blessed virgins Child
If we murmur or complain
Are we not sure we nothing gain
Months and years fly swift away.
and time is making no delay
Trials we must expect to meet
And know our joys are not complete
Yes all mankind were formd of dust
Life is short return to it we must
Our friends from us are called away
Remember we cannot always stay

Feeling rather Idle I take my pen thinging to write
A few lines to be busy myself although I spend
Eighty years have not improved my faculties
Still I remember twenty five years back more correct than
what has been transacted within a week when I take
A retrospective view of past scenes and think what
alterations and Changes there has been I cannot seem
to realize it seems like a dream. I think People
enjoyd their simple way of living as well as they
do now. I recollect ~~Succotuct~~ when the old meeting
was standing A Plain Building Cold with
Boards and a few Pews There a several Barns
now in town Finished much handsomer than
That was the pews as near as I remember resembled
A little pigs pen There was no bell on the house
But A small school house stood near by on
Common Finish'd of as poorly as the Meeting
House there was A little entryway where they kept
A Little Bell Hung all that Belong'd to the town
to ring for meetings or Funerals or what ever
There was Body seats below for the oldest People
Indoor seats in the Gallery for other People the most
popular

took the front seat and had Pegs put up to hang their Cork + Hats on made quite a show The singers sat on the same side they do now The Deacons us'd to read the hymn two lines or a verse and then they sung it they had a pitch pipe to pitch the tune after a while there was a bass Viol (viol) drum introduced and brought into the town and this suit the old People one old Gentleman got up took his hat of the peg and march'd off said they had begun fiddling then would be dancing next the Children occupied the stairs when the seats were full and I believe they enjoy'd they chose hiding men to keep them regulated but still their was some Confusion I would Describe their Dress as near as I can Remember it Consisted of one Dress of their Mothers old Dresses she had when she was Married or A Cheap Calico Courser than at Present I ever used I recollect the first one I had it was thirty Shea cents a yard as decent and I thought it was Beautiful as they were A Nice silk as for Bonnets I don't know but I think it was Straw Straw Bonnets

But Children went to meeting in such Clothes as they had now if they have not such Clothes as they like they stay at home they want A gold watch an Breast pin and rings on the finger In my Young Days we did not know what such things were There was A Minister in each adjoining town I Believe all of one Denomination old People call'd it the old staring Order There was no Distinction between saints and sinners they all set peacible under their own vine and fig tree. I have not Describ'd the Mens Attire it Consisted of A Cotton and linnen shirt A Pair of trowsers they were than called an under jacket one Coat or Frock no Padding or lining only a small facing for the Buttonholes and Buttons I have heard an old Lady say she could make A Coat in A day with her Baby in her lap It would have been thought extravegant for A young Man to have had Boots Before they were twenty one they wore Cow hide shoes and Leggins Sleeves was an upside Cloths they stood the Cold weather better than they do now

I must say a word about our schools. The scholars were under as good regulations as they are now. Their was no books in school except the Bible Dillingsworth spelling Book the grammes and Psalter and only one of A kind in A Family The teacher set all the Coppies made all the pens those that studied Arithmatic the Master wrote down the Rules and sums in their Books and then they had Birch Bark split to do their sums on Instead of slates. The school house was A little rough Building like a shed only it had A Door there was A large Fire Place large enough to hold severel logs and four feet wood and A stone hearth and Chimney and Cross leg'd Benches for writers. The Boys wore leather aprons and Breeches A for dinner the used to fetch a sausage or slice of Pork and a Crust of Bread sharpen a stick and Broil it over the coals and plenty of grease spots. The Girls wore short loose Gowns and shift and Thick leather shoes and woolen Stockings wore A blanket over their head For their Mothers old Cloak for the sum[illegible] they wore striped gowns and white and Cape Bonnet Colour'd otter Made out of an shirt of lap with bare feet you might as soon look for a white Bear as to see shoes on Children in summer time. The Dwelling houses for the most part had two rooms and a Fire Place about as large as they Build their little Kitchens now and an oven right over the fire place and a large stone hearth. The mostly Built one room first and when they got able set up another room and if they had A son Many generally settled down at home There was two Families in almost every house that had two rooms There is a few houses standing that was built before my remembrance they have been repair'd and Additions put up till they have been almost made over The People were farmers most of them went on Pretty much the same way every year Each one tried to raise enough for their Family they did not make much improvement nor speculate They kept Oxen and Cows and hogs for their own use rais'd Corn as Rye Potatoes and Beans and other vegetables were kept at Home They had no Carriages except a cart and sled they used to ride horseback to meeting have a saddle and Pillion the man rode forward the woman behind

sometimes go to visit their friends forty Miles and
Carry two Children they went to Market horse back
had a wallet made of tow Cloth left open in the
midle an a pair paniards made of Basket stuff
the woman went as often as the Men the swung the
wallet over the horses back put in their Boys each side
so as to Balance than the paniards filled with
filled with pigeons or something else. I remember
when there was but one old Chaise in town and I dont
remember of there being any thing that could be called
a Carriage seventy years ago. seventy years ago I dont
think there was a Carpet in town save a painted floor
Our diet was simple not so many Luxuries as they have
now good Bread and milk for supper and Breakfast
except sundays than we had tea at thanksgiving we had
Flower a good Chicken Pye and Mince pies and apple
and Pumpkin and Plumpudding I think a pound
answered sometimes a part was used in the Best
mince pies but not crouded if our Flower fell short
we used rye Flower we had good rye Indian Famines
did not bring by the Barrel 7 or 8 Bu used to answer the
purpose we had no Factories spun and wove and made
our own Clothing when we wanted something New

the Boys made A Pin lottery after a while they
made Gingerbread and caiman lotteries the Children
used to go and see it Drawd and take their Prize
if they had one. Now they must have Fairs they
have to spend time to Cook and than Pay for going
in to see and eat their own victuals and Poor Children
if they save a little money spend it for that which
Does them no good there is the grab bag to
to entice them and little toys that is of no use
and if they get rid of their money are sometimes
apt to take them without it makes gamblers and
thieves of them. But that dont satisfy they must
have Lectures often Pay a great Price and I hope
they are the wiser for it it is an old saying that every
Generation grew wiser I think they grow Prouder
The Bible says six days shalt thou labor and
do all thy work and rest on the sabbath man and
Beast there is not much exist now either go two three
Miles to meeting have three exercises Morning noon
and night to go more than home and back at night
and the things at home Neglected He that dont
Provide for his own House hold is worse than a
infidel we are commanded we are commanded

We are Commanded to work and get our living
by the sweat of our Brow and to eat and drink
and enjoy the fruit of our Labour, I recollect when
the Began began to go with two or four horses tackled in
a wagon it looked as strange as these new inventions
as the Law of steamboats, for I remember Families
moving to Ohio with Oxen and it use'd to take a good
while to get there, There were not many speculators
about I remember one round Changing Feathers and
he got round them Pretty well he had Geese Feathers
to change for old Feathers and changed by Measure
he said he wanted to be honest so he Chalk'd round
the Bedtick as high as the Feathers came and than he
said he would take them down his new feathers would
shake up light and the old heavy Feathers shook down
but the beds were light after they had swept a child
could lift what New Feathers they got. Money was not
Plenty but I guess they did not fail to make money
I think they were so honest for that. Neibours
used to visit and seemed to enjoy themselves They had
Brown earthen mugs kept Beer before supper make
a good mug of Flip and I beli[illegible] they relished it

and nothing said about signing the Pledge for
supper they generaly had fresh meat or sausages
on a short eye Cake made into a toast sometimes Rye
and that was good enough for a king. The women
were Neighborly and Industrious willing to assist each
other one would get in a bedquilt and the other
drop in and help get it out there was no societies
to call them from home a begging they went by the
Bible the poor you always have with you
and Charity begins at home, I dont remember
of ever hearing of Camp meetings or Conventions
twenty years ago when I was small folks used
to say giving folks ware all dead and beggars
ware a going to be hung if they should
thank them now it would turn the Country
some, We all have human nature no man
liveth and sinneth not. But if we do to others
as we would have them do unto us
we fulfil are commandments I dont know
but what Children will think it a fresh story
but if all the Books they read is as true as this
they may Believe them it is what I remember
as I have seen with my own eyes.

I will now begin in eighteen Hundred and three the year I was Married in august 21 I liv'd in the Middle of the Town from that time till the next april 1804 then I move'd to the north east District where I still remain. Mr Haynes Died August 27 Adge 86 years 1863. we had liv'd together 60 years He had Buried A wife an two Children. since that we have had Twelve Living Children Three died in infancy Three have died since two were married and had families I have six living three in town one in Californee one in Minesota. one in Maine I have had sixty one Grand Children and twenty one Great Gaand Children. People began to improve in Dress and living sixty years ago I cant Money enough to Buy A silk Dress when I was Married and A white Bonnet if you could see it you would say the shape resembled a scale that store keepers use we had to be prudent to lay by enough to Purchase a silk Dress they was as high as they are now and wages only four shillings a week or house work but we did not have so much Cloth in a dress as they do now and no needles tracings I have had Calico Dresses made out of six yards and half and it answered the purpose

Without a hoop. I can almost see the old Neighborhood where I was born I remember all my old Neighbors though now they are dead and gone The old Houses they occupied are gone also I remember the apple trees and what kind of fruit they bore. Widely they are dead also the Road I traveled day after day to school remains the same and the clear running Brook near where I liv'd looks natural I chance to go that way I did not know how much Comfort I enjoy'd while I went to school no cares on my mind and a kind Mother to look after me and keep me Comfortable still interested in my schoolmates they are almost all dead there is not more than is not more than four or five living in town now still I look with pleasure on the good old times that are past and gone and think of the little incidents that caused it is a blessing I enjoy it when I got settled down and had a Family I found it quite the reverse to the times I had seen But it happened I was placed in a neighborhood where the People were kind and obliging were willing to do what was right

I had a family of small Children and sometimes
thought it hard times to get along with them. Old People —
told me I was seeing my best days with them but
I did not think so
I found it to be true. Grand Mothers was Prized
in them days I was fortunate enough to have —
one in the house I Considered it a Pavilege —
If I wanted to Call on a neighbor take my —
knitting in my hand tye on a Clean apron and
I was Dressed an she willing to take Care of my
Children. It was Custommary in Winter to make
a Party for the Middle aged invite all the nearest
neibors and the school Master get a Meat supper
and the Company and Table set in the same —
room for the most part. Their was a Bed and
trap door in the room twas a Considerable —
Undertaking But they enjoyed it better than —
to call one or two at a time. In the summer
time we often made a quilting after we had —
got our old Cloths Pieced to gether for we had
a Set room to keep one in till we got time to do it
ourselves and that answered for a party I —
recollect Quilting in two at one time in our old —
Chambers and had help to get them out.

They did not stand about making Fashionable —
Calls to get in at tea time. My Mother used to
get her dinner at eleven o'clock an ready to start
at twelve she said if she could not go to do —
some good she had better stay at home —
But my old Friends are dead and gone —
Excepting a very few I have one living that
help me quilt in the Neighborhood in one —
in the south Part of the town. I don't think of but
one living in the District that was maried —
when I come to this Neiborhood it seems as
if their was not more than half the inhabitants
their was sixty years ago. I should think
there would have increased in that time —
but it is not so the old families have all
Died of some Families old and young —
and new ones took their Places. I could make
a long list of those that have died since
I lived here I will begin with our own —
Family we have had twelve Funerals at this
Place I Believe more than any other Family
I can mention many Families where they have

Rig (17)

five six seven or eight But it of no use to be
Particular about the number I think it was
singular when I come here that in almost every
house there was two Families and the heads
of each Family living their was not a ——

There was not a Widower or Widowe in
the Place. I think their has been improvement
in the looks of the District I am not much of
a judge about Farming the old Buildings are
all down and new ones in their Places and
the old Ditches and hedges turned up smooth
and nice and good Crops of Grain and Hay
raised if the season allows of it much more than
was sixty years I think it an industious
Neighborhood and a Peacable one I cannot
Expect ever to hear the sound of the loom
and wheels again although it would be
a Pleasure But if the war should Continue

Board [illegible]

I think the Farmers will Begin to raise Flax and
Hemp and keep sheep and the Women get their
old wheels repaird if they have any left
but they are chiefly Destroyed since Factories
have been started and thinking it more pleasent
to have a Dress that Costs more than wheels
enough to furnish a neighborhood and no
Profit and I Believe stoves have impoverisht
the Country I am sensible that our stove
Burns ant wood as fast as the Fire Place
it dost not take half the time to tend it that
it does a stove and all our Iron ware thrown
by and Brass kettles Pots that last nine
shillings worth nine pence and if any one wants
to hire a dairy maid I dont know where
they would find one without taking some old
woman that is not able to go through with it
I have lived in good time and I have now
the same I have done I have always lived
as Prudent as I do now and I dont know
no I have done any thing to Bring on the war

I think I have spent two Cents worth of time to save one
I have been told that my thread and yarn Cost more
than the garment was worth, I have been told that the
small Pieces I made my bedquilts on they should
have been in the fire before they would have spent
time to have done it. But I found time to do it.
and they share for themselves now. By saving
them I have had a good supply of bed clothes enough
and to spare to my Children and Prize them
higher than I should nice ones I had Bought them
and paid a high Price for them for I know
them to, I got them by own Industry and kept
My Children out of Idleness I have neglected
some things that I am sorry for that I have
no record of my near Relation I remember them
well but Cannot tell their ages, I had two sisters and
five Brothers one sister died Before I was born
I had one Brother and sister older than I was
and four Brothers younger all Married and had
families my Youngest Brother is living and has
five sons out in the war the others are dead

My Father Samuel Gleason Died June 24 1832
My Mother Hannah Gleason Died July 14 1834 I cannot
tell their Ages I think they were over eighty.
My Grandfather Gleason lived to be aged but I could
not tell how old he was. He was Married twice
My Father and two Brothers and sister were the
first womans Children Lela and Jonathan and
Elizabeth and by his second wife three Daughters
I never saw my Grandfather but one and my
Uncle Jonathan one as the oldest Daughter
by the second wife once they were married and had
families I expect their Children and Grand Children
are living some of them but I don't know any thing
about them they are all strangers to me.
~~My Grandfather and Grandmother Gleason~~
My Grandfather and Grandmother Brigham on my
Mothers side died Before I was born They had a large
Family of grown up Children and some of them
Married when my Grandfather went to Townmeeting
to what is called in England now the Towns were not
Divided then and in Crossing the Causeway

He was Drowned. his Children all lived to Marry and had large Families ten in number and not one died out of the number till they over sixty. My Cousins were numerous but now mostly dead and gone Israel Haynes my Husband left A record of our Family and his Father and Mother they had A large Family thirteen in number ten lived to marry and had Families but he had no record of their ages Israel Haynes his Father Died August 21 1808 adg 80 years Sarah Haynes his Mother Died March 22. 1802 aged 86 years his Brothers and sisters lived to a great age some of them over ninety his Grandfather Haynes lived to be aged he was insane twenty years his Grandmother Darby lived to be nearly a hundred or quite to have lived to A Great age and seen A Great many Changes and trials and almost been Double I compare myself to an old whip stick that has been broke and tied together

when old gives way to when I see my shadow I think of an aspen But I have the use of my hands and Can sit and do some kinds of work yet and that is a great Blessing that many are deprived of that are much younger than I am But when I Consider how many there is in the world that suffer for food and raiment and I never knew what it was to want a meat of victuals I think I have been Prospered and if adversity should be my lot may I not murmur or complain but think it all for the best If we were never afflicted we never should feel willing to leave this world but we all know we that we must sooner or later This is not our abiding place may we have our lamps trim'd and Burning that when the Bridegroom Cometh we may be ready

I undertake deliberately
I undertake deliberately
Love your Neighbour as
Love your Neighbour as your self
Command your temper
Command your temper 1863

Month after Month have swift flown away
And time is making sad delay
Remember we are only lent
That soon our days on earth are spent
How many friends are dead and gone
And never more they will return

Have we not many friends yet left
Although of many were bereft
Yet many Blessings is our lot
Never may they be forgot
Endeavour to do what's just and right
So we may look on the side that's bright.

"	to paid for 2 lb of nails	24
"	to one bittle for warren	50
"	to paid for ½ bushel salt	29
August	to 9 day work of Eb	
Sept	to paid for nails	50
Dec	to hops Bags & Corn	320

Like others he was born to die
In time of health Death was nigh
Nor could he command a day
Useful in life was called away
To he has gone to his long home
and never more he will return

Since we are all are formd of dust
How soon relase

"	by Cash for 1 watch clock	1 23
"	by Cash for potatoes	150
Dec 5	by Cash of Aaron Hunt for a steer	990

Since we are formd of Dust
How soon return to it we must
And here we cannot always stay
When summond we must all obey

Many times we ponder why
And not be voice to have our way
Remember we cannot afford
Yes must soon return to dust
What encompasses complain
Life is not to live in vain
Life is short and uncertain by
Learn to think that all must die
In human nature we all hope
Such is our state of comfort
Consider how we are placed on earth
Yet subject to death ever since our birth
Realize time makes no delay
Improved it quickly glides away
Sooner or later all must decay
Perhaps we may enjoy prosperity
Imagine we may meet adversity
Contentment may it be our lot
Kindred and friends never forget
And strive to help the suffering poor
Receive them kindly at your door

Few (poor and hopeless) with all mankind
Then pass cold disregard may meet

When death snatch from me my mother
I had wanted with her then and only brother
Sophia and niece I have left
Think I am not quite bereft
Have worthy neighbours left behind
Respect them they are just and kind
Our days began with trouble here
Patiently may we our trouble bear
Peace and patience may we see
Useful may we strive to be
Forget not the hungry poor
Feed them freely from your store
Ever do what just and right
Resolve to look on the side that's bright

	to ½ lb of nails	12

When in infancy we rest
Innocent on the breast we sleep
Rocked to the sound of lullaby
Learn to laugh Learn to cry
Sparkling days are spent on you
And never more they are Returns
Manhood weeks and days are posting on you
And never more they return

Boy now grown old and gray
Remember we have had our day
How quickly fleet days are & fathomed joy
Green Esplanade and Sea play
How many things we have met
Our trouble has our path crost
Month and work not fast away
and time remains now to pray

Mary Haynes

John Greenleaf Whittier

Thomas Tenney Sweetser

John Greenleaf Whittier, Maine

Early riseing gives us health
Living frugal brings us wealth
Industrious we all ought to be
Learn to imitate the busy bee
And strive to do what's just and right
and look upon the side that's bright

Human nature we plainly see
Hopeful may we strive to be
Never a mote in a neighbours eye
Think of a beam in our own eye.

Mary Haynes Sudbury October 15th

How we are placed on earth
And subject to death since our birth
Nothing here can call our own
No the future to us unknown
And still we cling to the world
Are even from it we are often hurld

Grey hairs when old come on a pace
Old wrinkles they deface the face
Our limbs grow feeble and decay
Death soon will claim us in his prey
Each one of us are only lent
Not long before our time is spent
Our friends are often called away
We when summon'd must obey.

1836 Zeb. N. Haynes Debt against his Father

Jane

Now see how and now mom will
Jon the story can be told
Be mean we will by our little boys
And mom little children dies
Each one for we my last
Like I shot a man in cold spirit

Now Attend Intelligent one
And Kind Seven Children and wife
Left many Regions has Sammy left
Over my Key to keep
Even we will command a day
Some a Cider will away

Hors by cash for Hogs	2400
Deer by cash of Aaron Hunt for a Bear	990
	5290

Settled January 4th 1837

Join near and hand in all that might
Ever look on Heaven that Bright
Rejoice that we have eyes to see
Gospel may we have to be
Time all mankind are bound of duty
Your own return to it we must
And Jesus have in earth without

Fair see all mankind in same degree
Other earths we ought to see
Sometimes a make in Adam's fallen
Even a Lamb is in our own eye

Years and days glide fast away
And time is making no delay
Our living here can last us over
Nor is the future to us known
And this not our abiding place
We many before have run the race

Therefore let your hearts take place
And whether they meet the face
Upon this world death and decay
Death can not all claim as a prey
Each one of us were formed of dust
None can evade the return he must
Our friends are often call'd away
We often summon'd must obey

Sudbury July 2 1865 Mary Haynes Sudbury 2
Make hay while the sun shines Mary Haynes
Sweet Sudbury town doth never need
Good Lord send thereon to feed
When all the storm is gone and past
Shall once a pleasant calm at last
All have risen in order bed
Like morning roses of fair red
With diligence mark well your mind
How death in this a succession find

On the new Year of 1854

One thats improved most
that will return again
He that can have patience can have what he will
Be first that ever you be last
If you like her well speak your mind before
If not so well leave her when you will
Be kind to one and true to all

Two years old Early rising gives us health
Living frugal brings us wealth
Read down from the Bible what we ought to do
And what we ought not to do
Learn to mind to what is just and right and look
upon the side that's bright. Mary Haynes
Sudbury October 20 1865 our days are
with trouble here our life is but a span and
cut short it lasts a span
So shall a King in man Mary Haynes
1 2 3 4 5 6 7 8 9 10 1 2 3 4 5 6 7 8 9 10 1 2 3 4 5 6

Read see that me
Soon you I love
than that I love you
up that you If

Question

Great study harm doth never breed
But being sent therein to speed
When all the storm is gone and past
Shall come a pleasent calm at last
I oft have seen in ashes bed
Lie burning coals of fire red
With Diligence mark well your mind
You shall in this a question find

Answer

Do bring to mind what's past and gone
Right and May doth bring it on
You have a question quickly
May you the answer quickly see

Mary Haynes Aged 26 years

Since we not all a handsome gift wealth
And sometimes let this understand
Riches are often transitory thing
Remember to themselves they'll take wings
Endeavours may we strive to be
Endeavour to imitate the ant and busy Bee
Then peace and plenty expect to see

Human nature we all happen
And it is true we all confess
Yes a mote in a neighbour eye soon spy
Not think of the beam that's in our eye
Each one of us are only lent
Soon on earth our time is short

Mary C Haynes Aug 31 1865

Must request my Bodies dee
Some soon to decaye
And must shake cachyke limbs of ours
The small earthing on the clay

Sudbury Oct 26 1865

Sudbury March 25th

On
Journey we have begun
Letters have got through 1865
Never more to be return

Ever find the softest widow
Sister or Mother all returnd to dust
and their lie to moulder and rust

Live A pure and virtuous life
And strive to make a loving wife
Useful may you ever be
Respect your friends and family
And may you enjoy Prosperity
Bright days we wish to see
Often we disappointed be
We meet with many trials here
Ever think they are severe
Never murmer or complain
If we do we nothing gain

Since all mankind we are found of dust
And unto it return we must
Realize this is not our abiding place
And so it is with all our race
Here not a day can call our own
and how soon our race is run

And if you should chance to change your name
May you ever be to me the same
And may you enjoy peace and prosperity
Neibors and friends live in unity
Delight in all that is just and right
And look upon the side that's bright

How many friends are dead and gone
And never more they will return
Yet many Blessings have been our lot
Never may they be forgot
Each one when summond must obey
Since ~~little and great~~
Since young and old are call'd away

Mind now yo while young and in your prime
Listen see how you spend your time
Behold how time glides fast away
Each one of us must soon decay
Remember old age is creeping on
Think how fast our glass is run
Our friends many of them have gone
How soon our journey will be through
And we must bid our friends adieu
Yes here we are only lent
Now when our time on earth are spent
Each one must pay the debt we owe
Sooner or later we all must go

While you are young and in your prime
In doing good spend your time
Learn to shun bad company
Listen to what your parents say
In many ways you may improve
And gain esteem peace and love
Months and years glide fast away
and time is making no delay
Kindness show to all mankind
So shall heaven you will find
Neglect no one because he is poor
Give him freely from your store

May your Star be bright
And like a beam it seems to me

Remember well infantine days
Yes dont forget the good old ways
Weary lines my years proclaim
And my faculties lose the same
Yes grey hair come on apace
New wrinkles have marred my face
Enjoyment seems from me flee
Shall soon be number'd with the dead

Academy January 11th 1836

The Conditions of sale of the following effects

A good one ex Jolleys (mare)

1st The Assistant Valuer will be the Auctioneer

Fresh leaves are formed at last
How soon shall I be cast
Old and young we all must
Women as maidens die
All must leave this world behind
So hope a better one to find

Health is what we all Desire
And patience what we all require
Yes happiness carries away
Nothing can we carry away
Each one when summond must obey
Sooner or later called away

Sooner or later called away
Health is what we all Desire
And patience what we all require
Yes happiness carries away
Nothing can we carry away
Each one summuned must obey
Sooner or later called away
