

Linda Huet-Clayton  
Sudbury Board of Health Member

Linda Huet-Clayton, BSN, RN, CNOR works in the operating rooms at Brigham & Women's Hospital specializing in cardiovascular surgery and has maintained her current position for over two decades. By drawing from her knowledge of relevant health concerns in the general population, she is able to use her skillset in making informed decisions on behalf of Sudbury's residents. As a result of participating in front line hospital work during the COVID outbreak, she was able to determine how to best mitigate impacts of the virus and applied that insight towards her role on the Board.

Linda has been involved with the BOH since 2009. She continues to stay updated on emerging public health issues through seminars and health trainings, most recently completing the Massachusetts Association of Health Boards Certification program.
