Calendar Year 2020

TO: Sudbury Well Drillers

RE: 2020 Well Installation Permit

In order to obtain a well permit (potable or irrigation) all applicants are required by the Sudbury Board of Health to submit the following forms, application and payment;

- Sudbury Well Permit Application
- Application Fee - Potable = \$200.00 / Irrigation = \$100.00
- Worker's Compensation Insurance Affidavit (enclosed)
- Copy of your Workers Compensation Insurance Declaration page.
- Drilling License with valid expiration date.
- Trench Permit Application and Submission of Fee (\$50.00).
- Drawing of plot plan (including all abutting properties plot plans with septics, dwellings and proposed well location (with footage). All abutting properties must be also be measured to ensure well(s) are located 100 from **all** septic components and wetlands. Map must be complete for submission. It is strongly suggested that drillers fill out a record request form to have a complete submission of all abutting properties. <https://sudbury.ma.us/publicrecords/>
- Once Irrigation wells have been installed the water department must be informed for final inspection. 978-443-6602.

Well driller's must submit an application for each Sudbury dwelling that is installing a well. Permits expire December 31, 2020, or at completion of permitted project.

If you have any questions or concerns, please do not hesitate to contact us at 978-440-5479.

Information and Instructions

Massachusetts General Laws chapter 152 requires all employers to provide workers' compensation for their employees. Pursuant to this statute, an **employee** is defined as "...every person in the service of another under any contract of hire, express or implied, oral or written."

An **employer** is defined as "an individual, partnership, association, corporation or other legal entity, or any two or more of the foregoing engaged in a joint enterprise, and including the legal representatives of a deceased employer, or the receiver or trustee of an individual, partnership, association or other legal entity, employing employees. However, the owner of a dwelling house having not more than three apartments and who resides therein, or the occupant of the dwelling house of another who employs persons to do maintenance, construction or repair work on such dwelling house or on the grounds or building appurtenant thereto shall not because of such employment be deemed to be an employer."

MGL chapter 152, §25C(6) also states that "**every state or local licensing agency shall withhold the issuance or renewal of a license or permit to operate a business or to construct buildings in the commonwealth for any applicant who has not produced acceptable evidence of compliance with the insurance coverage required.**" Additionally, MGL chapter 152, §25C(7) states "Neither the commonwealth nor any of its political subdivisions shall enter into any contract for the performance of public work until acceptable evidence of compliance with the insurance requirements of this chapter have been presented to the contracting authority."

Applicants

Please fill out the workers' compensation affidavit completely, by checking the boxes that apply to your situation and, if necessary, supply your insurance company's name, address and phone number along with a certificate of insurance. Limited Liability Companies (LLC) or Limited Liability Partnerships (LLP) with no employees other than the members or partners, are not required to carry workers' compensation insurance. If an LLC or LLP does have employees, a policy is required. Be advised that this affidavit may be submitted to the Department of Industrial Accidents for confirmation of insurance coverage. **Also be sure to sign and date the affidavit.** The affidavit should be returned to the city or town that the application for the permit or license is being requested, **not** the Department of Industrial Accidents. Should you have any questions regarding the law or if you are required to obtain a workers' compensation policy, please call the Department at the number listed below. Self-insured companies should enter their self-insurance license number on the appropriate line.

City or Town Officials

Please be sure that the affidavit is complete and printed legibly. The Department has provided a space at the bottom of the affidavit for you to fill out in the event the Office of Investigations has to contact you regarding the applicant. Please be sure to fill in the permit/license number which will be used as a reference number. In addition, an applicant that must submit multiple permit/license applications in any given year, need only submit one affidavit indicating current policy information (if necessary). A copy of the affidavit that has been officially stamped or marked by the city or town may be provided to the applicant as proof that a valid affidavit is on file for future permits or licenses. A new affidavit must be filled out each year. Where a home owner or citizen is obtaining a license or permit not related to any business or commercial venture (i.e. a dog license or permit to burn leaves etc.) said person is NOT required to complete this affidavit.

ARTICLE XXVII:

In- Ground Irrigation Systems

Purpose: It is the purpose of this bylaw to establish requirements for the installation of in-ground irrigation systems on residential properties for the protection of the quality and quantity of water supplied by the Sudbury Water District.

Applicability: All in-ground irrigation systems serving residential uses installed after the effective date of this bylaw will be required to comply with the following:

1. Installation of new in-ground irrigation systems and expansion of existing systems will be permitted only when the source of water supply is a private well owned and under the control of the property owner or a legally created organization of the owners of property using the well.
2. All wells installed for the purposes of this bylaw shall be subject to the regulations of the Sudbury Board of Health. All wells shall be tested for coli form bacteria and shall require treatment if such tests indicate the presence of coli form.
3. Installation and continued operation of such systems will be in accordance with the requirements herein:
 - (a) Private wells for irrigation purposes shall not be located within one hundred (100) feet of a sewage disposal system, within one hundred (100) feet of an existing potable water supply well and within one hundred (100) feet of a wetland or vernal pool. Lesser setbacks to sewage disposal systems may be approved by the Board of Health.
 - (b) All wells shall be dug or drilled to a minimum depth of 100 feet, unless it is demonstrated through hydro geological analysis that the cone of influence of the well at its maximum pumping capacity does not intercept any surface water resource.
 - (c) There will be no connection between the private water supply and the municipal water service. Separation using valves or removable sections of pipe is prohibited.
 - (d) Discharge of water from the private water supply will be through sub-surface sprinkler heads which rise when activated by water pressure. Water from this source will not be available through sill cocks, garden hoses or any other points.
 - (e) The purpose of the private water supply is limited to irrigation of lawn and plants, and is not to be used for washing automobiles, filling swimming pools or as a potable water supply.
4. Irrigation systems sourced by private water supplies and operated as described herein shall not be limited to specific hours of operation nor odd/even days of use if the Town declares a water emergency.
5. All irrigation systems shall utilize moisture sensors.
6. An Integrated Pest Management Plan shall be complied and submitted with an application to install an in-ground irrigation system. The plan shall encourage

- minimal use of fertilizers and pesticides by use of non-chemical methods to control pests, such as by the use of indigenous species of plants.
7. Sellers of property covered by these regulations are responsible to inform the purchaser of these requirements in any purchase and sale agreement.
 8. A permit to install a new in-ground irrigation system shall be required from the Board of Health and fees for review and inspection shall be established. All other state, federal or local approvals shall be required where necessary.

Exceptions: In-ground irrigation systems installed on land used primarily and directly for the raising of fruits, vegetables, berries, nuts and other foods for human consumption, feed for animals, flowers, trees, nursery or greenhouse products, and ornamental plants and shrubs; or on land to be used in a related manner which is incidental thereto and represents a customary and necessary use in raising such products.

These regulations were revised to include the following and shall be effective 4/4/06:

3. (a) Private wells for irrigation purposes shall not be located within one hundred (100) feet of a sewage disposal system, within one hundred (100) feet of an existing potable water supply well, and within one hundred (100) feet of a wetland or vernal pool. **Lesser setbacks to sewage disposal systems may be approved by the Board of Health.**

Approved Town Meeting: 4/4/06
