Sudbury Board of Health Rescinds Mask Advisory

On September 13th, 2022, Sudbury's Board of Health voted to rescind the Mask Advisory. This decision follows recently [updated guidance](#) from the CDC that was adopted by MDPH on August 15th, 2022. Masking remains an important piece in the prevention of the spread of Covid-19 especially to those with weakened immune systems and chronic conditions that leave you susceptible. Remember to mask in the following instances:

- When ending isolation wear a mask around others, including household members, for 10 days. If you have had two negative tests taken 48 hours apart you may remove your mask prior to day 11.
- If you have been exposed to someone with COVID you must wear a mask anytime you are around others inside your home or indoors in public for the 10 days following your exposure, unless you are unable to mask
- If a school, daycare, business or workplace requests that you be masked.
- Masks are required in a healthcare setting.

For more information on how to select and wear a mask click [here](#). Your continued support in preventing the spread of COVID and keeping your community safe for all is greatly appreciated.
