**Importance:** High

Vivian,  
The Corps has reviewed the Eversource Energy Sudbury-Hudson Transmission Reliability Project "USACE Area Plans" dated "11/1/2018".

This email serves as our concurrence with the permit areas outlined on the above-referenced plans. Please note, however; as discussed on the phone with you, the Corps assumes that all erosion control barriers associated with the project will not be located within wetlands.

Contact me with any questions.

Thanks,  
Mike
