

Video Camera Setup

1. Place camera on tripod by sliding mount into tripod head. Please note that you will need to push in button on side of tripod head to fully slide the camera in place. You may also need to loosen the thumb screw.

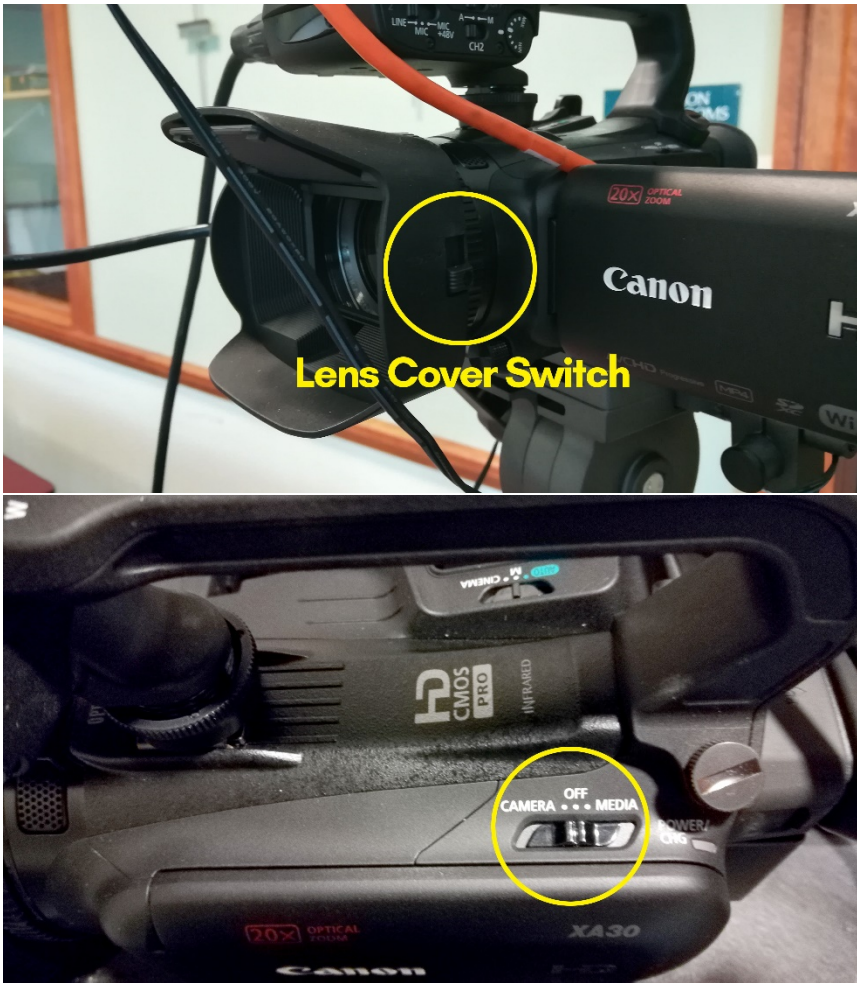

2. Plug in microphone to INPUT 1. Be sure to align 3 pins correctly. Make sure the MIC Settings are as follows:
 - a. INPUT 1: MIC +48V-----CH1: A-----SWITCH ON

3. Plug in adapters—one for camera and one for internet streaming box. Turn on camera by sliding switch to “Camera.” Don’t forget to open the lens cover.

4. Turn on internet streaming box. It will take a minute or so to be "READY." Also make sure the ethernet cable is plugged in.

5. Begin recording with camera.

6. Push the red button on the internet streaming box. Confirm that you want to go "LIVE." The red button also functions as a joystick to choose different options.

7. Push red button again to go "off air."
