The Bruce Freeman Rail Trail (BFRT) is a proposed trail running north-south through Sudbury along the old New Haven Railroad. It will eventually connect Lowell to Framingham, giving residents recreational opportunities and access to numerous locations, including the Commuter Rail Stations in both Concord and Framingham. There are many other benefits that will come from this project, such as important pedestrian safety upgrades at trail crossings. Please join us on Thursday, March 9, from 7:00 - 9:00 pm at Town Hall for a presentation on the progress of this great resource.
