

## Sudbury to Hudson Transmission Reliability Project Survey Work & Soil Sampling Planned in your Area Winter 2021

Dear Neighbor,

As part of the Sudbury to Hudson Transmission Reliability Project, Eversource will be gathering information along the Project route, including conducting survey work and subsurface investigations in your area.

Over the next several weeks, Eversource contractors will be conducting soil sampling in the MBTA corridor in your neighborhood. Soil sampling is an activity where a small amount of soil is collected from underneath the ground and the properties of the soil are then characterized to help Eversource finalize the design of the project.

### What You Can Expect

First, we want you to know that this work will not interrupt electric service to your property, and all people working in the field will carry proper identification.

In Sudbury, soil sampling will be completed within the inactive MBTA corridor. Access to the right-of-way will take place off Dutton Road, Peakham Road, Horse Pond Road, Union Avenue and Boston Post Road.

**Please note that these activities do not indicate the start of construction for the project near your home or business.**
