

October 7, 2022

Dear Neighbor,

As part of its ongoing commitment to deliver reliable energy and superior service to customers, Eversource will be constructing a new 115 kilovolt (kV) underground transmission line in your area. **Eversource will be starting construction of the Sudbury to Hudson Transmission Reliability Project in the coming weeks.** This Project is one of several that are designed to improve the reliability of the electric system serving your area. Please be assured that this work will not interrupt your electric service.

We're Always Working to Serve You Better

The upcoming work involves 7.6 miles of underground line within an existing, inactive Massachusetts Bay Transportation Authority (MBTA) railroad corridor, passing through Sudbury, Marlborough, Stow, and Hudson. The remaining 1.4 miles of line will be located under streets in Hudson. The new line will be constructed between the Eversource substation in Sudbury, and the Hudson Light and Power substation in Hudson. Representatives from the Project will be in touch with additional notices before construction approaches your property.

The upcoming work for 2022 will occur in the streets in Hudson and in the inactive railroad corridor in Sudbury and Hudson. Over the next few weeks, crews will begin establishing work zones in Hudson and Sudbury. All people working on the Project are Eversource-approved contractors and carry proper identification.

Project Duration

We anticipate the entire Project to take two years to complete, however, work in your area will be occurring intermittently during that time. Project construction will take place in phases and you can expect to see crews at different times throughout the course of the Project. **Eversource will follow-up with notifications summarizing the work. We will also provide frequent updates on the Project website and through routine email communication.**

Stay Informed – Contact us

Eversource is committed to being a good neighbor and doing our work with respect for you and your property. Keeping open lines of communication is important to us. If you would like to learn more about the Project, please contact us with one of the methods below.

- Phone: **1-800-793-2202**
- Email: **projectinfo@eversource.com**
- Email updates: visit **<https://bit.ly/ESSHsignup>** or scan the QR code.

Sincerely,

Michael Hager

Eversource Project Manager

Where We Will Be Working

Crews and equipment will remain within public streets and sidewalks along the project route in Hudson and be working within an inactive existing MBTA corridor in Hudson, Stow, Marlborough and Sudbury.

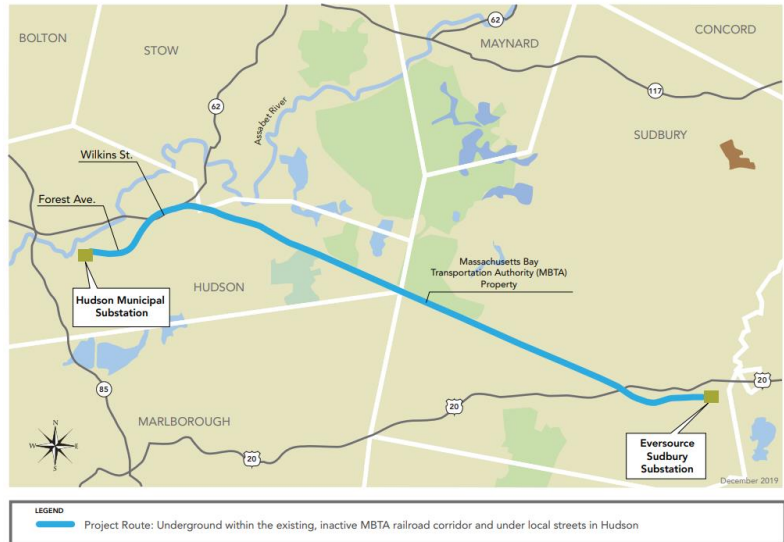

What You Can Expect

Approved construction work hours for the project are **7 AM to 6 PM, Monday to Friday**. Occasional activities may be performed beyond these hours based on approval from local officials.

Project Activities Include:

- Setting up of a safe and secure worksite.
- Vegetation removal in the inactive MBTA corridor.
- Surveying and marking out the roadway for existing underground utilities.
- Cutting existing asphalt and excavating to accommodate vault installations followed by a trench.
- Installing cables in an underground duct bank, a group of tubes designed to house electric lines.
- Restoring roads and other areas disturbed by the work.
