**Subject:** Project Update (04/19/23) - Eversource 115-kV Transmission Line

[Visit the Project Website](#)

Greetings!

Members of the community can expect to see continued construction activities at several sites related to the Eversource 115-kilovolt (kV) Underground Transmission Line Project in Sudbury and Hudson. Eversource asks people to avoid walking on the inactive Massachusetts Bay Transportation Authority (MBTA) rail corridor.

Crews are focused on placing cable vaults (also called manholes or MH for short) and installing duct bank. In both cases the operation begins with excavation, installing the cable vault or duct bank, and backfilling trenches. Crews generally work between recently placed cables vaults to install duct bank, for example, between MH7 and MH8.

### **Work Hours**

Approved work hours are 7 a.m. to 6 p.m., Monday to Friday but crews are working from **7 a.m. to 3:30 p.m.** Occasional work may extend beyond the approved hours, due to unforeseen circumstances, based on approval from local officials.

Below is an overview of the active work zones. [View the project map](#) for additional details on the location of work crews.

### Hudson

- **On Forest Avenue, between Richardson Street and Old North Road**, crews are installing a cable vault (MH3) in the road. Work in this area should be completed by early next week. Following placing this vault, crews will move to install MH2 (west of Marlboro Street) starting in the coming weeks.
- **On Forest Avenue between MH4 (south of Glendale Road) and Wilkins Street heading into the MBTA Corridor**, crews are preparing to start installing duct bank in the road. Work in this area could start as early as April 28 based on final approval from local officials.
- **In the inactive MBTA corridor between Chestnut Street to Bridge 130**, crews are excavating, installing duct bank, and backfilling trenches between MH7 and MH8.
- **In the corridor from Parmenter Road to White Pond Road**, crews are excavating, installing duct bank, and backfilling trenches between MH11 and MH12. Starting as early as next week, crews will perform similar activities from MH12 to MH13.
- **Crews are also in the process of completing road crossings between sections of the inactive MBTA corridor**, by excavating, installing duct bank, and backfilling at Parmenter Road (near the Charter Oak Country Club). Next week similar activities will be conducted at Main Street (west of Kane Industrial Drive).

### Sudbury

- **Between Boston Post Road and Bridge 127**, starting as early as next week, crews will begin installing a cable vault (MH21) north of Jarman Road. Following this installation, crews will move to placing MH25 (north of Maple Avenue).

*\*Due to the complexities of underground construction, the two-week schedule described above is subject to change.*

---

## Traffic Management

**Due to the Forest Avenue closure needed for this work**, cars coming to Forest Avenue from the north will detour down Richardson Street to Causeway Street, then left onto Old North Road, to get back to Forest Avenue. Cars traveling south on Forest Avenue will be directed to take Old North Road to get to Causeway Street, and then will detour right on Richardson Street to get back to Forest Avenue.
