Website

## Eversource 115-kV Project Update

Greetings!

Over the next week, you can expect to see construction activity at work sites in Sudbury and Hudson (in the inactive MBTA corridor) related to the Eversource 115-kilovolt (kV) Underground Transmission Line Project. Drivers and pedestrians are asked to be mindful of signage and the direction of police details.

### Work Hours

Approved work hours are 7 a.m. to 6 p.m., **Monday to Friday** but crews are working from **7 a.m. to 4 p.m.** in most areas. Occasional work may extend beyond the approved hours, due to unforeseen circumstances, based on approval from local officials.

Crews work between manholes (MHs) that have been placed along the project route. For a closer look, [View the project map](#).

### Hudson

- Roadwork on Forest Avenue has stopped for the season and will resume in Spring 2024 between Hudson Light and Power and Marlboro Street based on final approval from local officials.
- **Between Wilkins Street and Chestnut Street**, crews are working on building out a cattle crossing and will hydroseed near the new Chestnut Street tunnel.
- **At Bridge 130**, crews are working to install walers and H-piles for the future bridge installation.

## Sudbury

- **From Dutton Road to Peakham Road**, crews are installing duct bank from MH19 to MH20. An additional crew is working on final grading activities in this area.
- **Between Horse Pond Road and Union Ave**, crews are working on final grading and gravel installation over the next few weeks.
- **Between Union Ave and Boston Post Road**, crews are working to install duct bank.
- **From Boston Post Road to Bridge 127**, crews will be working on duct bank installation between MH25 and MH 26.
- **From Bridge 127 to the Sudbury Substation**, crews are installing duct bank between MH26 and MH27.
- **At the Sudbury Substation**, crews will be conducting underground surveys next week, so that work on the duct bank installation between the Substation and MH28 can begin.

*\*Due to the complexities of underground construction and weather, the two-week schedule described above is subject to change.*

---
