Eversource 115-kV Project Update

Greetings!

The following is an update related to the Eversource 115-kilovolt (kV) Underground Transmission Project in Sudbury and Hudson.

Work Hours

- Sudbury - Approved work hours are 7 a.m. to 6 p.m., Monday to Friday. During the cable installation process, crews will work Monday to Saturday, from 7 a.m. to 5 p.m. All other activities in the corridor will happen from 7 a.m. to 4 p.m.
- Hudson - Approved work hours are 7 a.m. to 6 p.m., Monday to Friday. Crews will be working in the Hudson roads, based on final approval from the Town, from 8 a.m. to 5 p.m. During the cable installation process, which is starting next week, crews will be active from 7 a.m. to 5 p.m., Monday to Friday. Additional work might occur on Saturdays based on approval.

Occasional activities may extend beyond the approved hours, due to unforeseen circumstances, based on approval from local officials. Crews work between manholes (MHs) placed along the project route. For a closer look, [view the project map](#).

Hudson Activities

- Road work in the Hudson streets, on Forest Avenue, will resume in April, between MH2 and MH1 at Hudson Light and Power based on final approval from municipal officials.
- Between Chesnut Street and Parmenter Road, starting next week, crews will begin installing the transmission line by way of cable pulling from MH8 to MH10 in the inactive MBTA rail corridor. Cable pulling is the process of installing the new transmission cable from one manhole to the next. Property owners near these activities will receive further notifications and can expect to see crews intermittently at manholes during the cable installation effort.
- At Bridge 130, between Chestnut St and Main St, crews are installing conduit to tie into sections already installed in the corridor.

Sudbury Activities

- At Bridge 128, between the Town Line and Dutton Road, crews are installing conduit to tie into sections already installed in the corridor. Similar activities are happening at Bridge 127 between Boston Post Road and the Sudbury Substation.
- Crews are accessing manhole locations underground in Sudbury throughout the MBTA corridor to proof the recently installed transmission conduit. This process takes several hours and is in advance of the cable installation.

**Due to the complexities of underground construction and weather, the two-week schedule described above is subject to change.*

Stay Informed

Eversource is committed to being a good neighbor and doing any work with respect for you and your property. If you have questions, please contact us directly or click on one of the resources below.
