Eversource 115-kV Project Update

Greetings!

This is an update on activities related to the Eversource 115-kilovolt (kV) Underground Transmission Project.

Work Hours

- **Sudbury** - Approved work hours are 7 a.m. to 6 p.m., Monday to Friday. During the cable installation process, crews are working from 7 a.m. to 5 p.m., Monday to Saturday. All other activities in the corridor will happen from 7 a.m. to 4 p.m.
- **Hudson** - Approved work hours are 7 a.m. to 6 p.m., Monday to Friday. Crews are working in the Hudson roads from 7a.m. to 5 p.m., Monday to Friday. During cable installation, crews are active from 7 a.m. to 5 p.m., Monday to Saturday.

Occasional activities may extend beyond the approved hours, due to unforeseen circumstances, based on approval from local officials. Crews work between manholes (MHs) placed along the project route. For a closer look, [view the project map](#).

Hudson Activities

- On Forest Avenue, two crews are excavating and installing duct bank between Hudson Light & Power and Marlboro Street between MH1 and MH2. One lane of alternating traffic will be maintained whenever possible.
- Between Forest Ave and Wilkins Street, to tie sections of transmission cable together that were already installed, between MH3 and MH4. Crews will also be installing fiber optic cable, that is used for communications, between MH2-4. Additional cable installation activities in the road for the coming weeks will include cable splicing, which lasts up to several days, splicing, and final testing of the new underground transmission line. All these activities will be based at existing manhole locations and will occur intermittently over the next few months.
- In the inactive MBTA corridor, crews are installing loam and seed that is part of the restoration effort. Additional crews will be repairing erosion controls in certain sections of the corridor.

Sudbury Activities

- In the inactive MBTA corridor, crews are installing loam and seed that is part of the restoration effort.
- At Bridge 128, crews will be working to install the bridge's railing system.
- At the Sudbury Substation, crews are splicing, to tie sections of transmission cable together that were already installed, between MH28 and the Sudbury Substation.

**Due to the complexities of underground construction and weather, the two-week schedule described above is subject to change.*

Stay Informed

Eversource is committed to being a good neighbor and doing any work with respect for you and your property. If you have questions, please contact us directly or click on one of the resources below.
